EDUCATION

University of South Florida

May 2026

Bachelors of Science, Computer Science **GPA:3.96/4.0**

WORK EXPERIENCE

Software Engineering Intern

June 2025 - August 2025

Bank of America

- Designed a Confluence–SharePoint dashboard using Python & Angular, projected to reclaim **100+** team hours per month
- Engineered Angular front-end migration from v13 to v20, reducing UI latency and improving maintainability and test stability through optimized rendering and modernized architecture
- Collaborated with product owners, and stakeholders to gather requirements and deliver a prototype within 6 weeks

Software Engineering Intern

January 2025 - May 2025

Delta Airlines

- Designed and delivered a SQL-based internal tool that cut manual entry by **60%**, improving efficiency across **5** departments
- Conducted data analysis & feature engineering to support LSTM forecasting models, improving operational planning
- Mapped data lineage for over **100+** systems to enhance traceability, system integration, and stakeholder confidence

Technical Product Management Intern

May 2024 - August 2024

Regdev Inc.

- Collaborated with stakeholders to define data structures and automate workflows, reducing data handling time by **80%**
- Led end-user interviews and feedback cycles to iterate on a product interface, improving alignment with real-world needs
- Designed a user-centric interface that streamlined data review workflows and reduced manual review overhead

Software Engineering Intern

May 2023 - July 2023

Gupshup Technologies

- Automated **10,000+** chatbot responses using Python, pandas, and regex, reducing analysis time by 6 hours per week
- Improved model accuracy and latency by **20%** using ReAct prompt engineering, increasing project throughput by **15%**

PROJECTS

ModelSight: LLM Observability & Reliability Platform

- Built an LLM proxy and observability platform to monitor prompt/response drift, hallucinations, and output quality in production AI systems
- Designed automated evaluation, traceability, and alerting pipelines for reliability monitoring and enterprise compliance

LeaseLink: Student Subleasing Platform

- Launched an MVP subleasing platform for USF students, acquiring **250+ users** and interest from **20+ universities**, driving a nationwide product rebuild
- Led end-to-end full-stack development using React (web), Flutter (mobile), and Supabase, while defining product strategy, roadmap, and go-to-market execution

LEADERSHIP

Vice President of External Affairs

Society of Hispanic Professional Engineers, USF

- Led strategic planning and execution to cultivate **\$10,000** in corporate partnerships, driving **30%** chapter growth
- Directed a team of **9** to establish **20+** partnerships, showcasing strong leadership and stakeholder management

Vice President

TEDxUSF

- Led a **17** member team to execute TEDxUSF keynote events with smooth coordination, delegation, and operations
- Managed a **\$7000+** budget & coordinated logistics for events, optimizing resources to maximize engagement & impact

SKILLS & HONORS

Honors:	Presidential Scholar, Dean's List, Bulls LEAD, Resident Assistant, Teaching Assistant
Analysis & Strategy	SQL, Excel modeling, Data Structuring, Forecasting, Business Process Optimization
Languages & Tools:	Python, SQL, C/C++, Java, HTML, CSS, Javascript, ReactJS, Visual Studio, Flutter, Git
Relevant Coursework	Data Structures, Natural Language Processing, Software Engineering, Database Design, Software System Design, Computer Architecture, Computer Logic Design, Statistics, Linear Algebra
