Education

University of South Florida 2026
Bachelors of Science, Computer Science: **Summa Cum Laude, GPA:3.91**

Work Experience

Software Engineer July 2026 - Present

Bank of America
- Develop and maintain internal system management applications using Java and Angular, supporting tools used to manage enterprise technology environments
- Build and enhance REST APIs, backend services, and SQL-based workflows that integrate system-management tools with enterprise platforms.
- Contribute across the software development lifecycle, including technical design, implementation, unit testing, code reviews, CI/CD deployment, and troubleshooting
- Collaborate with engineers and product stakeholders in an Agile environment to develop new functionality and investigate application and production issues.

Software Engineering Intern June 2025 - August 2025

Bank of America
- Designed a Confluence–SharePoint dashboard using Python & Angular, projected to reclaim **100+** team hours per month
- Engineered Angular front-end migration from v13 to v20 improving scalability, maintainability and test stability through optimized rendering and modernized architecture
- Collaborated with product owners, and stakeholders to gather requirements and deliver a prototype within 6 weeks

Software Engineering Intern January 2025 - May 2025

Delta Airlines
- Designed and delivered a SQL-based internal tool that cut manual entry by **60%**, improving efficiency across **5** departments
- Conducted data analysis & feature engineering to support LSTM forecasting models, improving operational planning
- Mapped data lineage across **100+** systems to improve traceability across a large-scale distributed data platform

Projects

ModelSight: LLM Observability & Reliability Platform
- Built a fault-tolerant LLM proxy and observability platform on cloud-native architecture to monitor prompt/response drift, hallucinations, and output quality at scale
- Designed scalable CI/CD evaluation and alerting pipelines for reliability monitoring in distributed AI systems

LeaseLink: Student Subleasing Platform
- Launched an MVP subleasing platform for USF students, acquiring **250+ users** and interest from **20+ universities**, driving a nationwide product rebuild
- Led end-to-end full-stack development using React (web), Flutter (mobile), built on cloud-native infrastructure using Supabase, while defining product strategy, roadmap, and go-to-market execution

Leadership

Vice President of External Affairs

Society of Hispanic Professional Engineers, USF
- Led strategic planning and execution to cultivate **$10,000** in corporate partnerships, driving **30%** chapter growth
- Directed a team of **9** to establish **20+** partnerships, showcasing strong leadership and stakeholder management

Vice President

TEDxUSF
- Led a **17** member team to execute TEDxUSF keynote events with smooth coordination, delegation, and operations
- Managed a **$7000+** budget & coordinated logistics for events, optimizing resources to maximize engagement & impact

Skills & Honors

Honors:	Presidential Scholar, Dean's List, Bulls LEAD, Resident Assistant, Teaching Assistant
Analysis & Strategy	Excel modeling, Data Structuring, Forecasting, Business Process Optimization
Languages & Tools:	Python, SQL, NoSQL, C/C++, Java, HTML, CSS, Javascript, ReactJS, CI/CD, AWS, Flutter, Git
Relevant Coursework	Data Structures, Natural Language Processing, Software Engineering, Database Design, Software System Design, Computer Architecture, Computer Logic Design, Statistics, Linear Algebra
